To whom it may concern

Subject: Supply of BlueTraker VMS transponders for fishing vessel tracking and monitoring

We hereby confirm that EMA d.o.o., Slovenia has delivered and successfully integrated **over 1000 BlueTraker transponders and VMS software** that our company sold to Croatian Ministry of Agriculture to become a part of Vessel Monitoring System (VMS).

The first batch of transponders was supplied and installed in **2007** (150 units).
The second batch of transponders was won in **2009** and installed in **2010** (300 units).
The third batch of transponders was installed in **2013** and **2014** (270 units).
The fourth batch of transponders was commissioned in **2015** (250 units) and
the fifth batch of transponders was installed and commissioned in **2016** (150 units).

Transponders are designed for tracking and monitoring of Croatian fishing vessels and transfer of electronic Logbook (catch reports and other reports).

We remain available for any future information that you may require.

Sincerely yours,
Nenad Hercigonja
PRIMARK, Croatia
Managing director
